

Internship Report – 1st Year – Johan Stragier  
Summer 2022  
Intermarché

**Intermarché** is a very well-known grocer in France, practically ubiquitous.

My role at Intermarché was to operate the cash register and sell gas tanks at the gas station adjoined to Intermarché Tourettes. I worked in a team with someone else so that we could rotate on shifts. One week I would do 7-14h and the other 14-21h in terms of shifts.

During my internship experience, I was able to discover the ins and outs of such a job. I particularly found the need for customer interaction to be useful in improving my communication skills. Although I found some customers to be challenging, overall I found it to be a valuable experience.

In conclusion, this was a job I had never done before and my first job where I had to interact with clients which as I expected was not always pleasant.

Thank you for your attention.
